- It reduces the valuable time and effort spent on properly reconciling the daily market settlements.
- Market and Shadow settlement calculations support.
- Automatic calculation of market charges.
- Invoice reconciliation.
- Detailed access to all calculations by market charge.
- Flexible charge configurator with version support.
- Dispute resolution Support.
- Enhanced Graphical user interface.

Project Name: GoServicePro FSC (Native Android & iOS Mobile Application)	
Organization	GoldCRM
Client	CoinMach, Christie, Orange, Daktronics, Permian, Brady
Team Size	4
Technology	Xamarin Android, Xamarin iOS, C#, VS 2010, VS 2015, VS 2017, VS 2019, WCF and SQLite.
Duration	December 2011 To Oct 2022

Roles & Responsibilities:

- Analysing technical specifications of both Android & iOS.
- Designing and Developing of Application.
- Involved in a User interface Designing to suit for all device orientation.
- Interaction with clients to discuss with their requirements.
- Customization to CRM mobile application based on business requirements.
- Responsible to publish the builds and release to QA and clients.
- As a Technical Lead, I used to assist other team members in the analysis of their problems and review their work.

Description:

- GoServicePro Field Service App puts the power in field technicians' hand, Techs assigned by job i.e., Work Order, when a work order is assigned to a technician their device notifies them with push notifications. Work orders can be viewed as a list, in an Outlook style calendar or geographically on a map.
- Technicians are provided extensive work order information, Work order information such as title, problem description, category, etc let a technician know exactly the problem they are trying to solve.

Technicians can do following things and utilise the features through the mobile app

- **Work Order logging:** Tech's can able to log the transactions like log timestamps, expenses, Activity, Notes, Install, Remove, Exchange, etc.
- **Part Orders:** Technicians can order parts for specific work orders, for sale to customers, or to replenish technician truck stock.
- **Truck Inventory:** Truck inventory provides visibility into the stock that technicians carry with them on their trucks.
- **Google Maps Integration:** Technicians can get turn by turn driving directions from their current location to their next work order.
- **Attachments:** Attachments provide technicians with a way to tell the service story in pictures and documents.

Project Name	: WA-NET, GSA Server, Wireless Advisor Administrator™
Organization	GoldCRM
Client	CoinMach, Christie, Orange, Daktronics, Permian, Brady
Team Size	5
Technology	ASP.NET, VB.NET, VS2015, SQL Server, Oracle
Duration	December 2011 To Oct 2022
